

SHUBHAM LOGISTIC

HEAVY ODC LOGISTICS & FLEET OWNERS

Pan-India Freight Shifting & Steerable Hydraulic Axle Terminal Shifting

Corporate Logistics Portfolio Brochure

Headquartered along the industrial Surat-Hazira road corridors in Gujarat, Shubham Logistic has provided critical high-tonnage cargo movements and specialized transport contracting services to leading power, refinery, infrastructure, and steel manufacturing conglomerates across India for over two decades. We maintain a modern heavy fleet, detailed road survey clearing teams, and complete scheduling integrity.

Head Office Address:

Plot No. 25, 26, Shubham Complex, Ichhapore Bus Stop No.3, Surat-Hazira Road, Surat, Gujarat.

Operations Call Desk: +91 99989 22711, +91 90990 22711

Core Logistics Operations

1. Heavy & Over-Dimensional Cargo (ODC) Consignments

We specialize in moving massive and high-clearance cargos that exceed standard structural dimensions. This includes refinery distillation boilers, wind turbine modules, heavy generator rotors, and structural steel blocks. Every dispatch is supported by steerable hydraulic axle modules, low-ground clearance mechanical trailer beds, and certified route clearances.

2. Fleet Ownership & Operations

By owning a high-capacity logistics fleet rather than operating as brokers, we maintain absolute schedule integrity. Our fleet covers heavy-duty prime movers, mechanical low-beds, drop-deck trailers, semi-low bed mechanical trailers, and multi-axle configurations. Our localized maintenance bays ensure zero dispatch lags.

3. Long-Term Industrial Transport Contracting

We execute long-term bulk shifting agreements for leading manufacturing groups. Our operations cover FTL (Full Truck Load) site relocations, daily containerized raw materials logistics, import-export dock movements, and coil haulage. We support our contract partners with dedicated tracking dispatchers and digital consignment logging.

Our Corporate Mission:

"To deliver high-impact heavy logistics services with absolute emphasis on safety, schedule"

"adherence, and clear client communications, helping our partners move massive structural assets reliably."

Our Operational Vision:

"To expand our specialized fleet of multi-axle trailers and heavy pullers, remaining the preferred"

"logistics contractor for high-tonnage industrial assets nationwide."

Equipment Technical Matrix

Shubham Logistic deploys heavy-duty haulage configurations engineered to transport massive industrial loads safely across all domestic terrains:

Trailer Category	Capacity Range	Typical Cargo Load	Configuration Specs
Hydraulic Axles	50 Tons - 250 Tons	Boilers, Turbines, Reactors	Steerable, Hydraulic compensation
Low Bed Trailers	30 Tons - 80 Tons	Excavators, Milling machinery	Gooseneck design, 0.8m clearance
Semi-Low Beds	25 Tons - 55 Tons	Windmill parts, Transformers	Multi-suspension chassis
Flatbed Platforms	20 Tons - 40 Tons	Steel Plates, Girders, Containers	Mechanical trailers, twist locks

Strategic Safety & Escort Coordination

- * Preventative Fleet Care: Every trailer axle pressure, brake line, and draw-bar coupling is tested prior to cargo loading operations.
- * Escort Route Patrols: On high-clearance cargo (exceeding 5 meters height), our road patrol surveys obstructing overhead power wires and coordinates shut-off permissions with utilities along the transit route.
- * Pan-India Legal Permits: We maintain continuous legal coverage under national transport compliance registers, securing toll, tax, and heavy movement clearance records automatically.
